

Chapter 01 – Introduction to JavaScript Programming

Full Exam Paper (with Correct Answers)

Lecturer: Dr. Ahmed Taajir

Part I – Multiple Choice Questions (20 Marks)

1. What is a computer?

- A) A mechanical device
- B) An electronic device that stores and processes data
- C) A manual calculator
- D) A digital phone

■ Correct answer: B

2. Main function of the CPU is to:

- A) Display output
- B) Control components & execute instructions
- C) Store data permanently
- D) Connect to the internet

■ Correct answer: B

3. RAM is _____ memory.

- A) Non-volatile
- B) Volatile
- C) Read-only
- D) Permanent

■ Correct answer: B

4. ROM stores:

- A) Temporary data
- B) Data currently being worked on
- C) Startup and basic system instructions
- D) User documents

■ Correct answer: C

5. The first network that led to the Internet was:

- A) TCP/IP
- B) WWW
- C) ARPANET
- D) NASA Net

■ Correct answer: C

6. Protocol developed by Vint Cerf and Robert Kahn:

- A) HTTP
- B) TCP/IP
- C) FTP
- D) IPX/SPX

■ Correct answer: B

7. The World Wide Web was created by:

- A) Bill Gates
- B) Steve Jobs
- C) Tim Berners-Lee
- D) Brendan Eich

■ Correct answer: C

8. A URL represents:

- A) A program name
- B) The address of a web resource
- C) A browser type
- D) A programming language

■ Correct answer: B

9. Application software is designed to:

- A) Control hardware
- B) Solve user problems
- C) Manage the CPU
- D) Configure BIOS

■ Correct answer: B

10. Machine language is written in:

- A) Binary code
- B) English
- C) Java
- D) Assembly

■ Correct answer: A

11. JavaScript is primarily used for:

- A) System programming
- B) Database management
- C) Client-side scripting
- D) Operating systems

■ Correct answer: C

12. JavaScript was invented by:

- A) Tim Berners-Lee
- B) Brendan Eich
- C) Mark Zuckerberg
- D) Bill Gates

■ Correct answer: B

13. Node.js allows JavaScript to run on:

- A) Mobile devices only
- B) Servers
- C) Browsers only
- D) Gaming consoles

■ Correct answer: B

14. Which language is compiled before execution?

- A) JavaScript
- B) Python
- C) C++
- D) PHP

■ Correct answer: C

15. A text editor is used for:

- A) Playing media
- B) Writing and editing code
- C) Installing hardware
- D) Sending emails

■ Correct answer: B

16. Example of a text editor for coding:

- A) MS Word
- B) Notepad
- C) Visual Studio Code

D) PowerPoint

■ Correct answer: C

17. Command to open Chrome DevTools:

A) Ctrl + P

B) Ctrl + Alt + T

C) Ctrl + Shift + I

D) Ctrl + F1

■ Correct answer: C

18. HTML tag to include JavaScript:

A) <js>

B) <script>

C) <javascript>

D) <code>

■ Correct answer: B

19. JavaScript command to print a message:

A) print()

B) document.log()

C) console.log()

D) echo()

■ Correct answer: C

20. JavaScript's first version appeared in:

A) 1980

B) 1995

C) 2000

D) 2015

■ Correct answer: B

Part II – True or False (20 Marks)

1. A computer can only process text data.

Answer: False

2. ROM memory is volatile.

Answer: False

3. The CPU is known as the brain of the computer.

Answer: True

4. The Internet began as a military project called ARPANET.

Answer: True

5. TCP/IP is used to send and receive data over networks.

Answer: True

6. WWW means 'World Wide Website.'

Answer: False

7. JavaScript must be compiled before it can run.

Answer: False

8. JavaScript was originally called 'Mocha.'

Answer: True

9. JavaScript is the same as Java.

Answer: False

10. ECMAScript is the official standard of JavaScript.

Answer: True

11. Node.js allows JavaScript to run on the server side.

Answer: True

12. HTML and CSS are examples of back-end languages.

Answer: False

13. Visual Studio Code is a popular text editor for developers.

Answer: True

14. Google Chrome cannot be used for testing JavaScript code.

Answer: False

15. The shortcut key to open developer tools is F12.

Answer: True

16. JavaScript was designed to make web pages interactive.

Answer: True

17. A URL is used to locate web resources.

Answer: True

18. JavaScript can update a web page without reloading it.

Answer: True

19. The first JavaScript program prints 'Hello, World!'

Answer: True

20. JavaScript cannot be used for mobile app development.

Answer: False

Part III – Direct Questions (20 Marks)

1. Define computer.

Answer: An electronic device that stores, processes, and retrieves data.

2. List three uses of computers in modern life.

Answer: Education, Business, Healthcare.

3. Explain the function of the CPU.

Answer: Interprets and executes instructions and controls all computer operations.

4. Differentiate between ROM and RAM.

Answer: ROM = permanent memory; RAM = temporary working memory.

5. What is the Internet?

Answer: A global network connecting computers for data exchange using TCP/IP.

6. Who developed TCP/IP?

Answer: Vint Cerf and Robert Kahn.

7. What does WWW stand for?

Answer: World Wide Web.

8. Define programming language.

Answer: A set of instructions for communicating with a computer.

9. Give two examples of high-level languages.

Answer: C++, Java, Python, or JavaScript.

10. What is the difference between a compiler and an interpreter?

Answer: Compiler translates before execution; interpreter runs line by line.

11. What is JavaScript used for in web development?

Answer: To add interactivity and dynamic behavior to web pages.

12. Who created JavaScript and when?

Answer: Brendan Eich in 1995.

13. Mention two JavaScript frameworks for SPAs.

Answer: React and Angular.

14. What is Node.js?

Answer: A runtime that allows JavaScript to run on servers.

15. State two advantages of web development.

Answer: Global reach and business opportunities.

16. List two popular text editors for coding.

Answer: VS Code and Sublime Text.

17. What is a web browser used for?

Answer: Retrieving and displaying information from the web.

18. Write JavaScript command to display 'Hello, World!'.

Answer: `console.log('Hello, World!');`

19. How do you open Chrome Developer Tools?

Answer: Press F12 or Ctrl + Shift + I.

20. Importance of JavaScript in modern web development.

Answer: It makes web pages interactive, responsive, and enables full-stack apps.
