READING

A Read the text. Choose the correct answers (a, b, or c).

How well do you know your cat?

Cats and humans have lived together for thousands of years. Wild cats were already living in human settlements, in Mesopotamia, as early as 12,000 BC. They were appreciated because of their ability to catch and kill mice and rats. However, most experts agree that they were probably domesticated in Egypt, around 4,000 years ago. In Ancient Egypt, these beautiful animals were an important part of religious life and the figure of a cat, or a woman with a cat's head, was an important and popular goddess.

Today, we don't believe that our pet cats are goddesses, but we are extremely fond of them and treat them with particular love and affection. But why is this, and where do our cuddly pets go when they're not asleep on the couch? How well do we *really* know them? A BBC documentary called *The Secret Life of the Cat* tried to find out the answers to these questions. The filmmakers got the owners of 50 cats to agree to have cameras and GPS trackers fitted to their pets so researchers could study their behavior when they were not at home or out hunting at night.

Although the documentary was entertaining and viewers learned a lot about what cats do without us, it didn't really answer the question as to why humans are so fond of cats. In fact, probably the most important discovery to come out of the program is that our pet cats are really just wild animals that we allow into our homes and feed. Maybe the only reason we don't notice that they are cruel killers is that they are not very big compared to their wild cousins. Because they are relatively small, we are not afraid that they will eat us during the night, but they are definitely not very different from a wild tiger in the jungle!

- 1 The article says that cats have lived alongside humans for ...
a a thousand years.
b about 4,000 years.
☒ c more than 10,000 years.
- 2 Cats were initially valued by humans because ...
a they were beautiful.
☒ b of their hunting skills.
c they had magical powers.
- 3 The BBC documentary focused on ...
a how cats interact with their owners.
b the use of modern technology in observing cats.
☒ c how cats behave when they are alone.
- 4 What did the documentary **not** do?
☒ a explain the popularity of cats as pets
b observe cat-hunting behavior
c answer questions about what cats are like
- 5 Why are people not aware of how dangerous cats are?
a because they don't look like tigers
☒ b because they are not very big
c because we think of them as pets
